

## I1 Interpreter Project

Copy `S1.java` to `I1.java`. Then replace every occurrence of "S1" in `I1.java` with "I1".

Be sure your name is in `I1.java`.

Modify `I1.java` so that it is a pure interpreter than interprets the `S1.s` program correctly.

Compile your I1 interpreter with

```
javac I1.java
```

Interpret `S1.s` (which is in the J1 Software Package) with your I1 interpreter with

```
java I1 S1 > I1.txt
```

Submit to your instructor `I1.java`, and `I1.txt` in the form requested. If files are requested, do NOT submit a ZIP FILE.
